

LAKSHAN MIHIRANGA

SENIOR SOFTWARE ENGINEER

[LinkedIn](#) | [GitHub](#) | kglmihiranga@gmail.com | +94 71 350 7889

SUMMARY

Results driven Software Engineer passionate about designing and developing scalable, high-performance enterprise-grade web applications with over three years of experience. Skilled in **JavaScript**, with expertise in modern front-end frameworks (**React**, **Vue.js**) and backend development (**Node.js**, **Spring Boot**). Enthusiastic about leveraging **AI/ML** technologies to solve real-world problems. Enjoy contributing to innovative open-source projects and experimenting with cutting-edge tools in my free time.

PROFESSIONAL EXPERIENCE

D F N Technologies (Pvt) Ltd (Senior Software Engineer) **April 2025 - Present** (1 year experience)

- **Mentorship & Estimations:** Regularly provided accurate time estimations for bug fixes and feature implementations, ensuring effective sprint planning and resource allocation. Actively guided junior developers by reviewing their code, sharing best practices, and supporting their technical growth within the team.

D F N Technologies (Pvt) Ltd (Software Engineer) **May 2023 - April 2025** (2 years experience)

- **End-to-End Requirement Development:** Independently analyze and implement new feature requests by meticulously reviewing requirement documents, ensuring 100% alignment with client expectations and timely delivery.
- **Bug Resolution & Technical Expertise:** Achieved a 100% success rate in debugging and issue resolution while enhancing proficiency in JavaScript, Ember.js, WebSockets, NGINX, and other core technologies.
- **Onsite Client Collaboration:** Traveled to Saudi Arabia for 3 months to work directly with the client, fostering stronger collaboration and ensuring seamless project execution.
- **Efficiency-Driven Development:** Designed and developed reusable components, reducing development time and effort for the engineering team while improving code maintainability.
- **Key Responsibilities & Domain Expertise:** Developed and enhanced mission-critical trading platform features including:
 - **Order Management:** Order path routing, order book visualization, and execution workflows
 - **Market Data Systems:** Real-time watchlists, multi-level market/sub-market hierarchies
 - **Trading Analytics:** Interactive charts with technical indicators, dynamic quote systems
 - **Fund Management:** Cash transfer interfaces and portfolio tracking modules

iCan Lanka (Pvt) Ltd (Software Engineer - Intern) **Nov 2022 - May 2023** (6 months)

- **E-Commerce Website Optimization:** Upgraded the company's e-commerce platform using modern technologies (VUE.js and Java), improving performance by 30% and enhancing user experience, leading to higher customer satisfaction and engagement.
- **Leave Management System Development:** Designed and implemented an automated Leave Management System, streamlining HR processes and reducing administrative paperwork by 40%.
- **Warehouse Management System (WMS):** Built a scalable Warehouse Management System to optimize inventory tracking and operations, cutting manual documentation efforts by 40% and improving efficiency.

PROJECTS

Skill Share (Ongoing) (React.js, TailwindCSS, Springboot, MongoDB, CI/CD Pipeline, Github, AWS)

A platform for skill exchange, where users can learn new skills by teaching others. The platform operates without monetary transactions — knowledge and skills are the only currency.

- Developing both the frontend and backend by myself, utilizing the latest features of React.js and Spring Boot to fully leverage the capabilities of these technologies.
- Implemented JWT authentication to ensure secure access, requiring each backend request to include a valid token.
- Implemented highly dynamic component loading based on user interactions, with centralized language tags to simplify future maintenance.

Service Station Management System (React.js, TailwindCSS, Spring Boot, Github, MySQL)

A platform for service stations to manage internal operations and efficiently handle customer interactions.

- Utilized GitHub for version control, enabling seamless parallel development within the team and ensuring 100% transparency of changes.
- Opted for a relational database due to the lack of diverse data types, improving data consistency by 40%, and addressing the limited future scalability needs of the application for at least 5 years.

PHARMA (React.js, Node.js, Express, MySQL, React Native)

Online medicine ordering and delivering application

- Implemented a web application for pharmacies, reducing manual inventory tasks by 60%, and a mobile application for customers and delivery agents, improving order processing speed by 40% and user satisfaction.

TECHNICAL SKILLS

Frontend: React.js, Ember.js, Next.js, Redux, Redux Toolkit, JavaScript, ES6, TypeScript, jQuery

Mobile: React Native, Cordova, Android, Hybrid Apps development

Backend & APIs: Node.js, Firebase, REST API, WebSocket, MySQL, MongoDB

UI/UX: HTML5, CSS, SCSS, TailwindCSS, Figma

Tools & Process: Git, GitHub Actions, Agile/scrum, OOP, Atlassian (Jira, Bitbucket), AI LLMs (AI Agents, GPTs, Claude)

EDUCATION

Bachelor of Science in Computer Science **Mar 2020 - Mar 2023**

University of Colombo School of Computing - GPA: 3.32 (Second Class Upper Division)

- Coursework Highlights: C, C++, Scala, R, Flutter, Arduino, PHP, DSA, Operating Systems.

SOFT SKILLS

- | | | |
|---------------------------|-------------------|----------------------|
| • Collaborative | • Empathetic | • Project Management |
| • Effective Communication | • Problem Solving | • Can do mindset |
| • Leadership | • Time Management | • Eager to learn |
